Universal Search

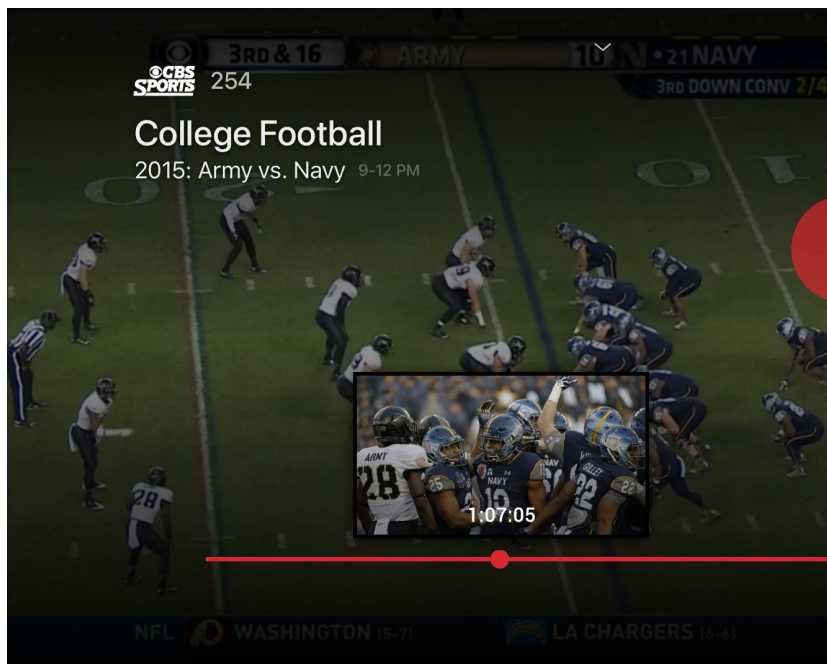

Are you already subscribed to a streaming service like Netflix or Amazon? From voice search to featured content, you'll start to see your content, regardless of what service it comes from, in one place.

Media Player & Remote

Play, pause, seek and change channels

When viewing the video player, you can open controls to play / pause, seek and more by pressing the “Select” button on your remote. This is how you will also enable closed captions and other accessibility settings.

You can **change channels** by choosing the left or right directional controls on your remote control.

How To's

USE THE GUIDE

Browse the Guide

The guide is a channel based way to browse live and upcoming content. You can filter out stuff that you're not subscribed to as well as by movies, sports, news, kids and more.

When you select a program, you'll see a quick view with description and other information as well as a mini player. Inside the quick view, you can also set recordings as well as go to the full show or movie details page.

Also, many channels allow us to automatically record 3 days of programs so if you missed your favorite show and forgot to record it, you can navigate backwards in the guide to watch programs that have already aired.

BROWSE AND SEARCH

Quickly find what you want to watch

We're always trying to help you find stuff you want to watch without having to work too hard to do it. That's why you'll see shows and movies featured across different categories when you visit these pages including the ability to pick up watching where you left off on previously watched content, personalized recommendations based off of your watch history, hand picked favorites from our staff as well as top content by genre.

You can also search for content by title to see results across live, on demand and upcoming. If you have Alexa, try using the <product name> Alexa skill to search using your voice.

SET AND MANAGE RECORDINGS

Set it now, watch it later

Inside of the quick view as well as the full content details page for any content that is either live or upcoming, you'll be able to set a recording. You can also set a series recording to automatically record new episodes as they air with options to record from only specific channels, only new episodes (no re-runs) and extend the recording time.

From the Profile section, you can also access all of your recordings to either quickly watch, change recording options or delete recordings if you're running out of space. If you record a lot of content, you can buy more space!
